

Success Story  
Shalom Center Home Buying Program

Hello.  
With the housing counseling help of Shalom Center  
We are telling the story of buying our "Dream Home"

I am a 33 years old accountant and husband is a 38 year old warehouse manager.  
We as a married couple with a 3years old son, always maintained good credit, but never dreamed of using that credit towards buying a house.

Once while reading the newspaper we read about the housing counseling programs of shalom Center which lead us to meet with President Jee Lee who made our dreams come true.

Among Many government programs available he helped us choose the best to match our situation in this case a good place for our son's education and a home mortgage loan that we could afford. The reason we were able to take the brave step in purchasing our town house, was mainly due to 3 things;

First, we attend homebuyer workshop ad understand the process of buying a home.

Second, Shalom Center provide persistent supports after one-on-one meeting to review our options such as affordable mortgage products for first time homebuyer, assisting a budget plan and overall credit history information to make my American dream come true.

Third, because of the support we received from Shalom Center's home buying team such as knowledgeable realtors and lenders.

Homeownership is a n investment in our future. As we have always wanted we moved into an environment that is both safe for our child fun for him to grow up in. We will always be grateful to God, and work harder to make our lives better. It is such a blessing for my family.

We with more people could find our about Shalom Center and Change their lives like us.

Thank you very much.
